A broad decision making checklist

- What aspects of this situation should I be concerned about?
  In respect of each of these aspects (or together if relevant) answer the questions below:
  - What is my role and mandate?
  - What does the law say?
  - What does my organisation (policies and procedures) say?
  - What does my professional framework say? What is good practice in this situation? (practice standards, accepted good practice characteristics and strategies, core values, code of ethics, ethical decision making processes)
  - What does my personal framework say?
  - What impact/s will/might my decision/approach have on my client? On others?
  - What other processes should I use to inform what I do? (e.g., seek advice / information that is necessary and relevant, assess alternative options, apply a particular practice model etc.)
  - What else should I consider here?
  - On what grounds can I justify what I do?
